

Introduction

The courses at Humanex Academy are designed to meet the individual needs of each of our students. In developing their curricula, teachers carefully consider the Colorado Model Content Standards. In addition, they provide a range of options for how the necessary skills and content will be learned. These qualities join together to create challenging and interesting learning opportunities for our students. Students may choose courses according to their ability level and courses required. Elective credits may be chosen from all the disciplines. If a student is college bound, it is recommended that he or she take an additional year in math and science.

Students at Humanex Academy are required to complete the following for graduation in grades 9-12.

| | | |
|-----------------------------|--------------------|---------------------------------------|
